b. Click **Accept**.

3. Associate Dx and Sign Order.

The screenshot displays the 'Medications' section of the careCONNECT interface. At the top, under the 'Medications' header, two items are listed: 'furosemide 20 mg tablet' and 'lisinopril 10 mg tablet'. Below this is a blue navigation bar with several options: 'Dx Association' (circled in red), 'Edit Multiple', 'Create Panel', and 'Options'. A yellow informational banner states 'This patient has active treatment/therapy plans.' Below this, the 'Outpatient' section is visible, featuring a 'Referral to Psychiatry, Transcranial Magnetic Stimulation' with details on referral type and services required. A pharmacy address is also listed: 'CVS/pharmacy #5828 - LOS ANGELES, CA - 1001 WESTWOOD BLVD. AT WESTWOOD VILLAGE' with a phone number. At the bottom of the interface, there is a status bar with 'PRINT AVS', a document icon with the number '2', 'PEND', and a blue button labeled 'SIGN ORDERS (1)' (circled in red).
