

# Join a Study Measuring Activity in Your Brain

SPONSOR: KERNEL

**TALK TO YOUR CLINICIAN TODAY**

## Main Eligibility Criteria:

- ✓ Between the ages 18 and 65 (75 for SPRAVATO)
- ✓ Primary diagnosis of Major Depressive Disorder (MDD)
- ✓ Determined by clinic to be eligible for SPRAVATO, ketamine, or TMS treatment
- ✓ Agree to start treatment with study participation

Study length varies based on treatment and individual timelines but may last up to 3 months. The study involves 3 visits to a participating clinic. Each visit will take about 1 hour to complete and includes filling out questionnaires and wearing a headset equipped with hi-tech sensors to record brain activity while participants complete tasks
